

## **Mass Email to blast**

Dear **blank**:

I wanted to let you know about *Climate Hustle*, a movie which exposes the corruption and pseudo-science being perpetuated by the United Nations, EPA, and Obama administration on the issue of climate change.

**The movie will be seen in theaters nationwide on one night only: Monday, May 2<sup>nd</sup>.**

The documentary is produced by CFACT, the Committee For A Constructive Tomorrow. CFACT is a Washington, D.C. based public policy group that has been on the frontlines battling liberal environmentalists for over 30 years. With the upcoming election, I think you'll agree it is critical that we all have solid facts on environmental and energy issues in order to prevent the radical left from drastically changing this country.

*Climate Hustle* has been featured on "Hannity," and has been touted by the *National Review* as "Brutal and extremely funny."
